 12 Flinders Ln, Melbourne VIC 3000, Australia
 Date of catalog: 18/3/2021

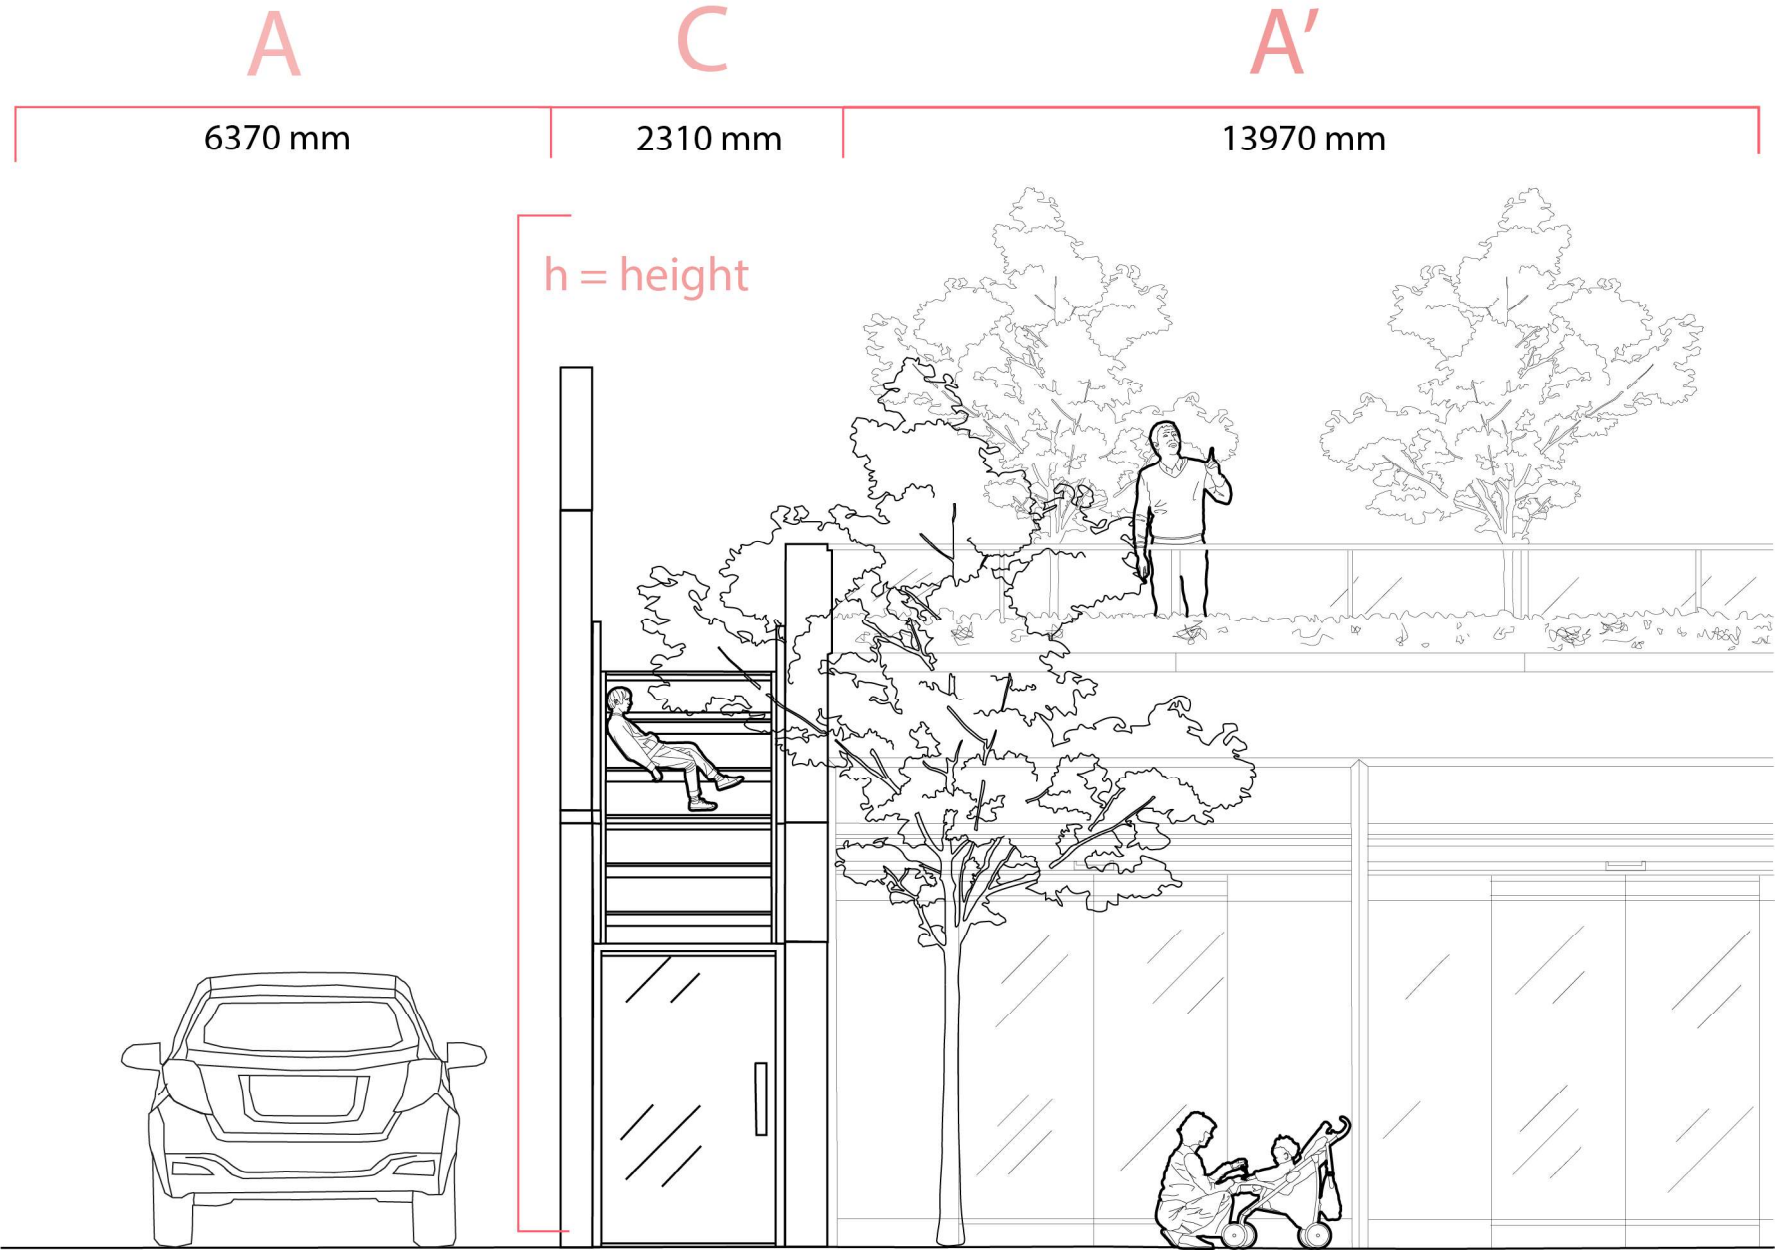

S2S: THRESHOLDS SEM2 2020

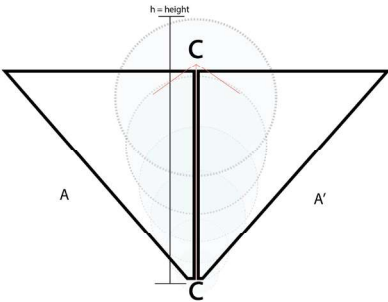

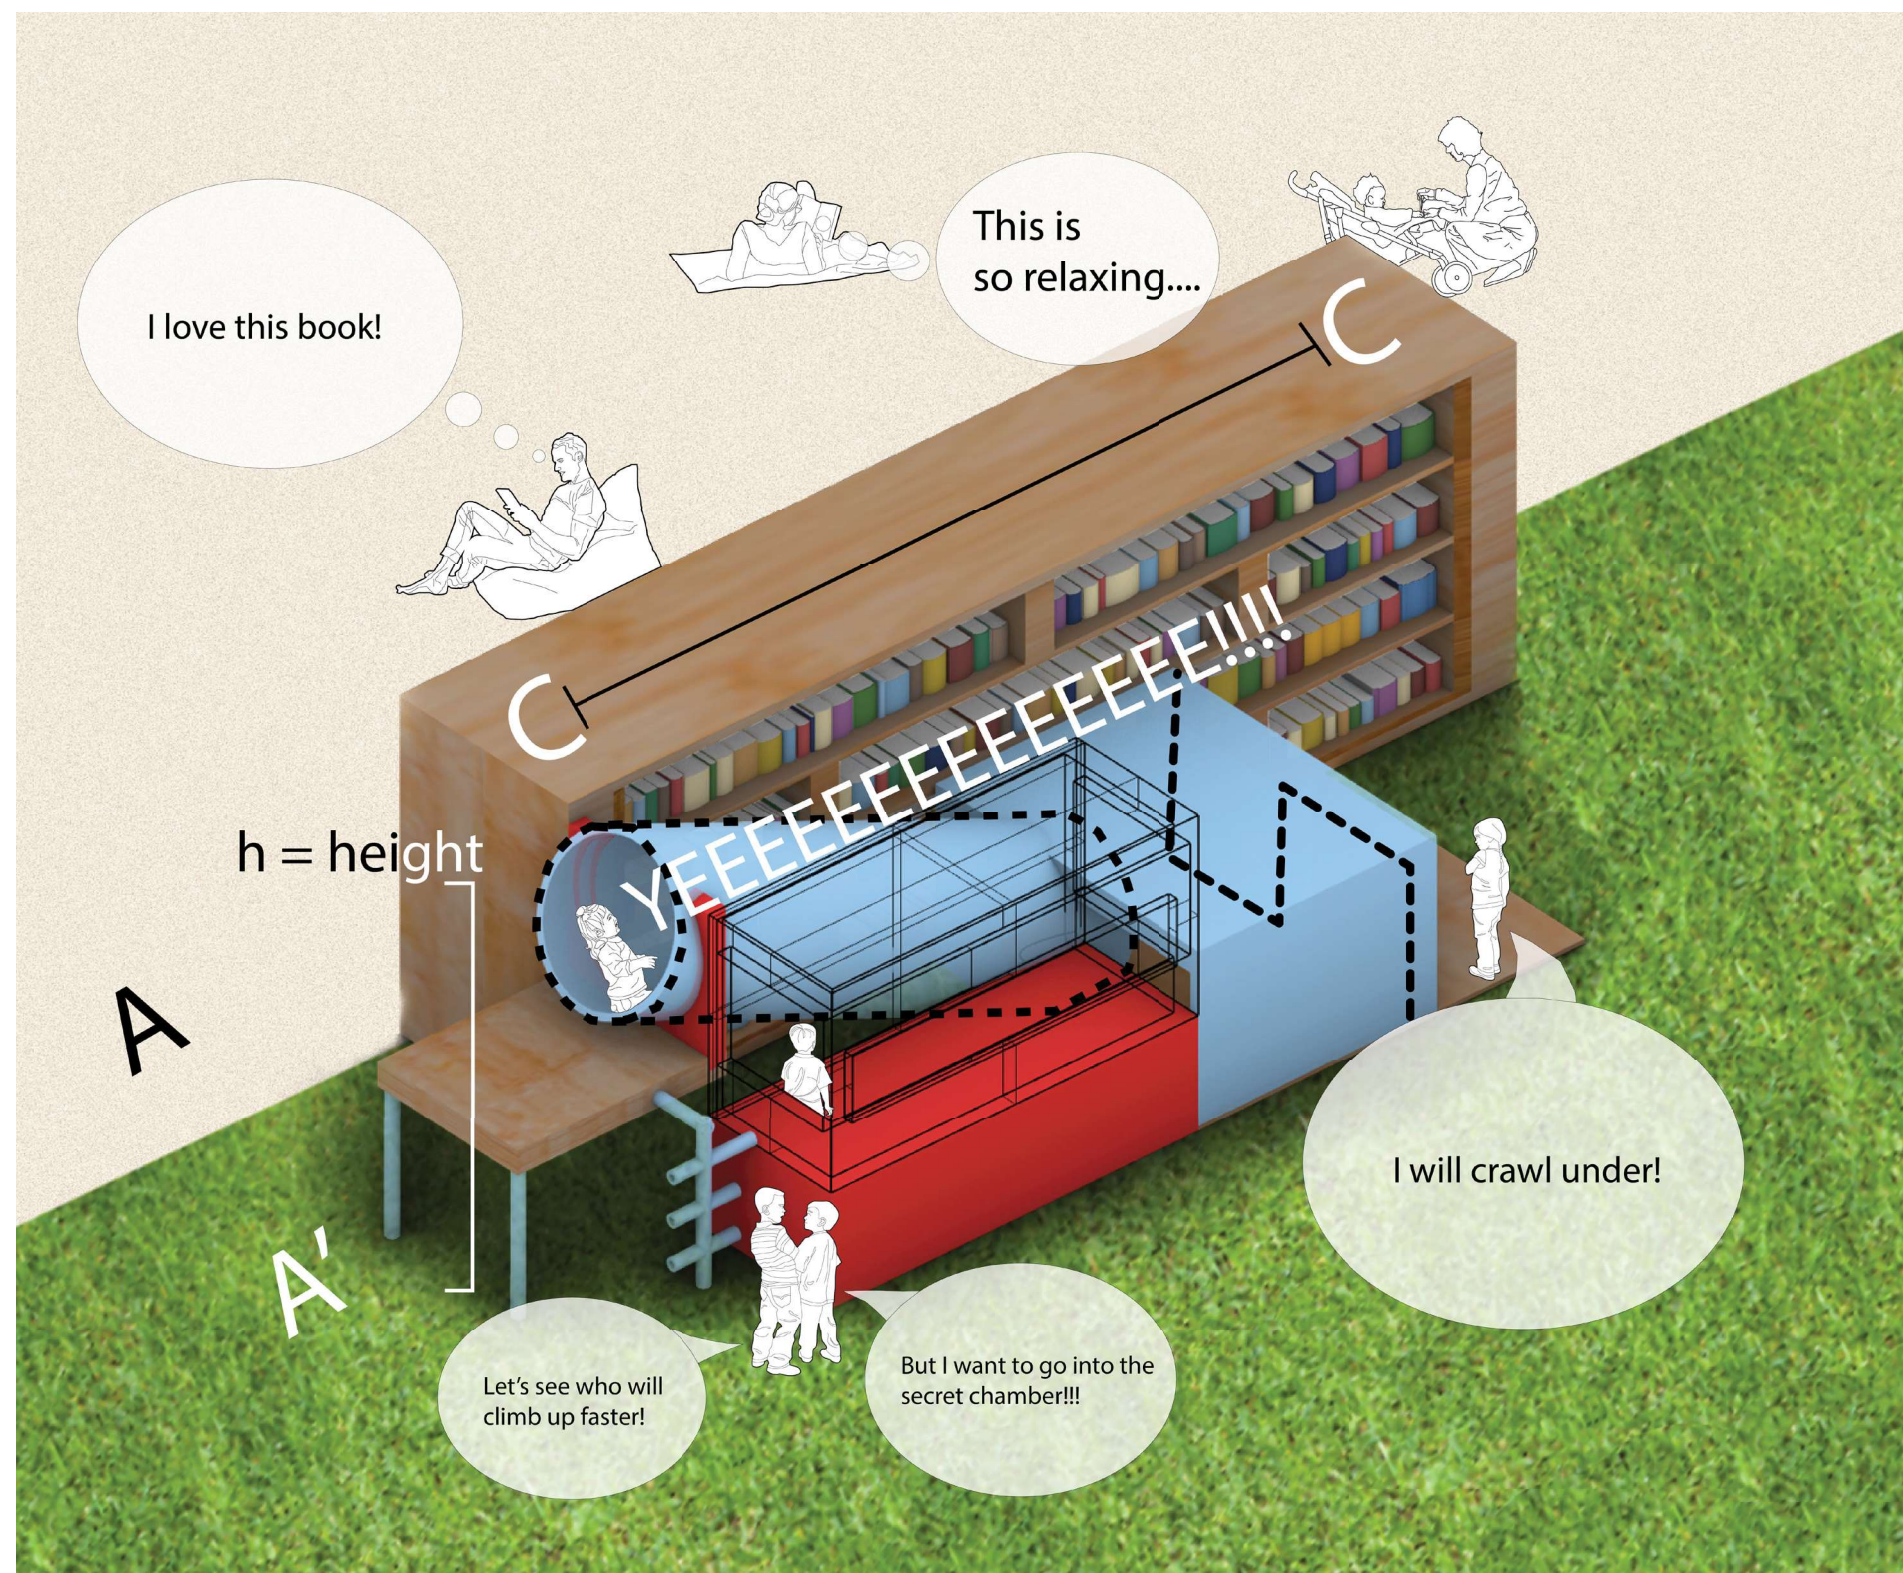

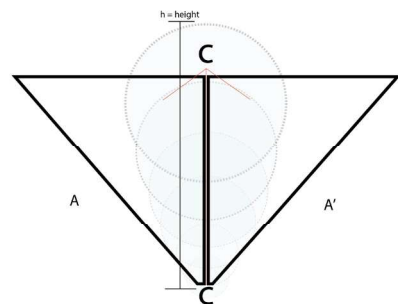

HIDE AND SEEK

The threshold (C) is the wall separator. While the wall separates the busy mall area (A') and the quiet road to the parking lot (A), it is also closed from the public. There is a door that close the access point from the public to the balcony beyond the staircase which create this feeling of an unknown destination. It is also engaging to the public as some people might question about how to go behind that closed door. Therefore, this system is called Hide And Seek because it shows a journey of figuring out how to get into one, potentially unknown, place.

MELISSA HORNE MP/WALL SEPARATOR FRONT ELEVATION	
Location	12 Flinders Ln, Mclbourn, VIC 3000
Scale	1:50@A3

HIDE AND SEEK RE-IMAGINATION

The re-imagination is an interactive hub for children. The tunnel (underneath) behaves as a hidden threshold. At the front, it might look like there is no access point to the top of the hub to look outside. However, children can crawl under the tunnel to gain access to the back and climb up the ladder to get access to the top floor. There are also two bookcases which separate the noisy playground to the quiet relax area.
