ENTRANCE
273-299 Elizabeth St
9th March 2022

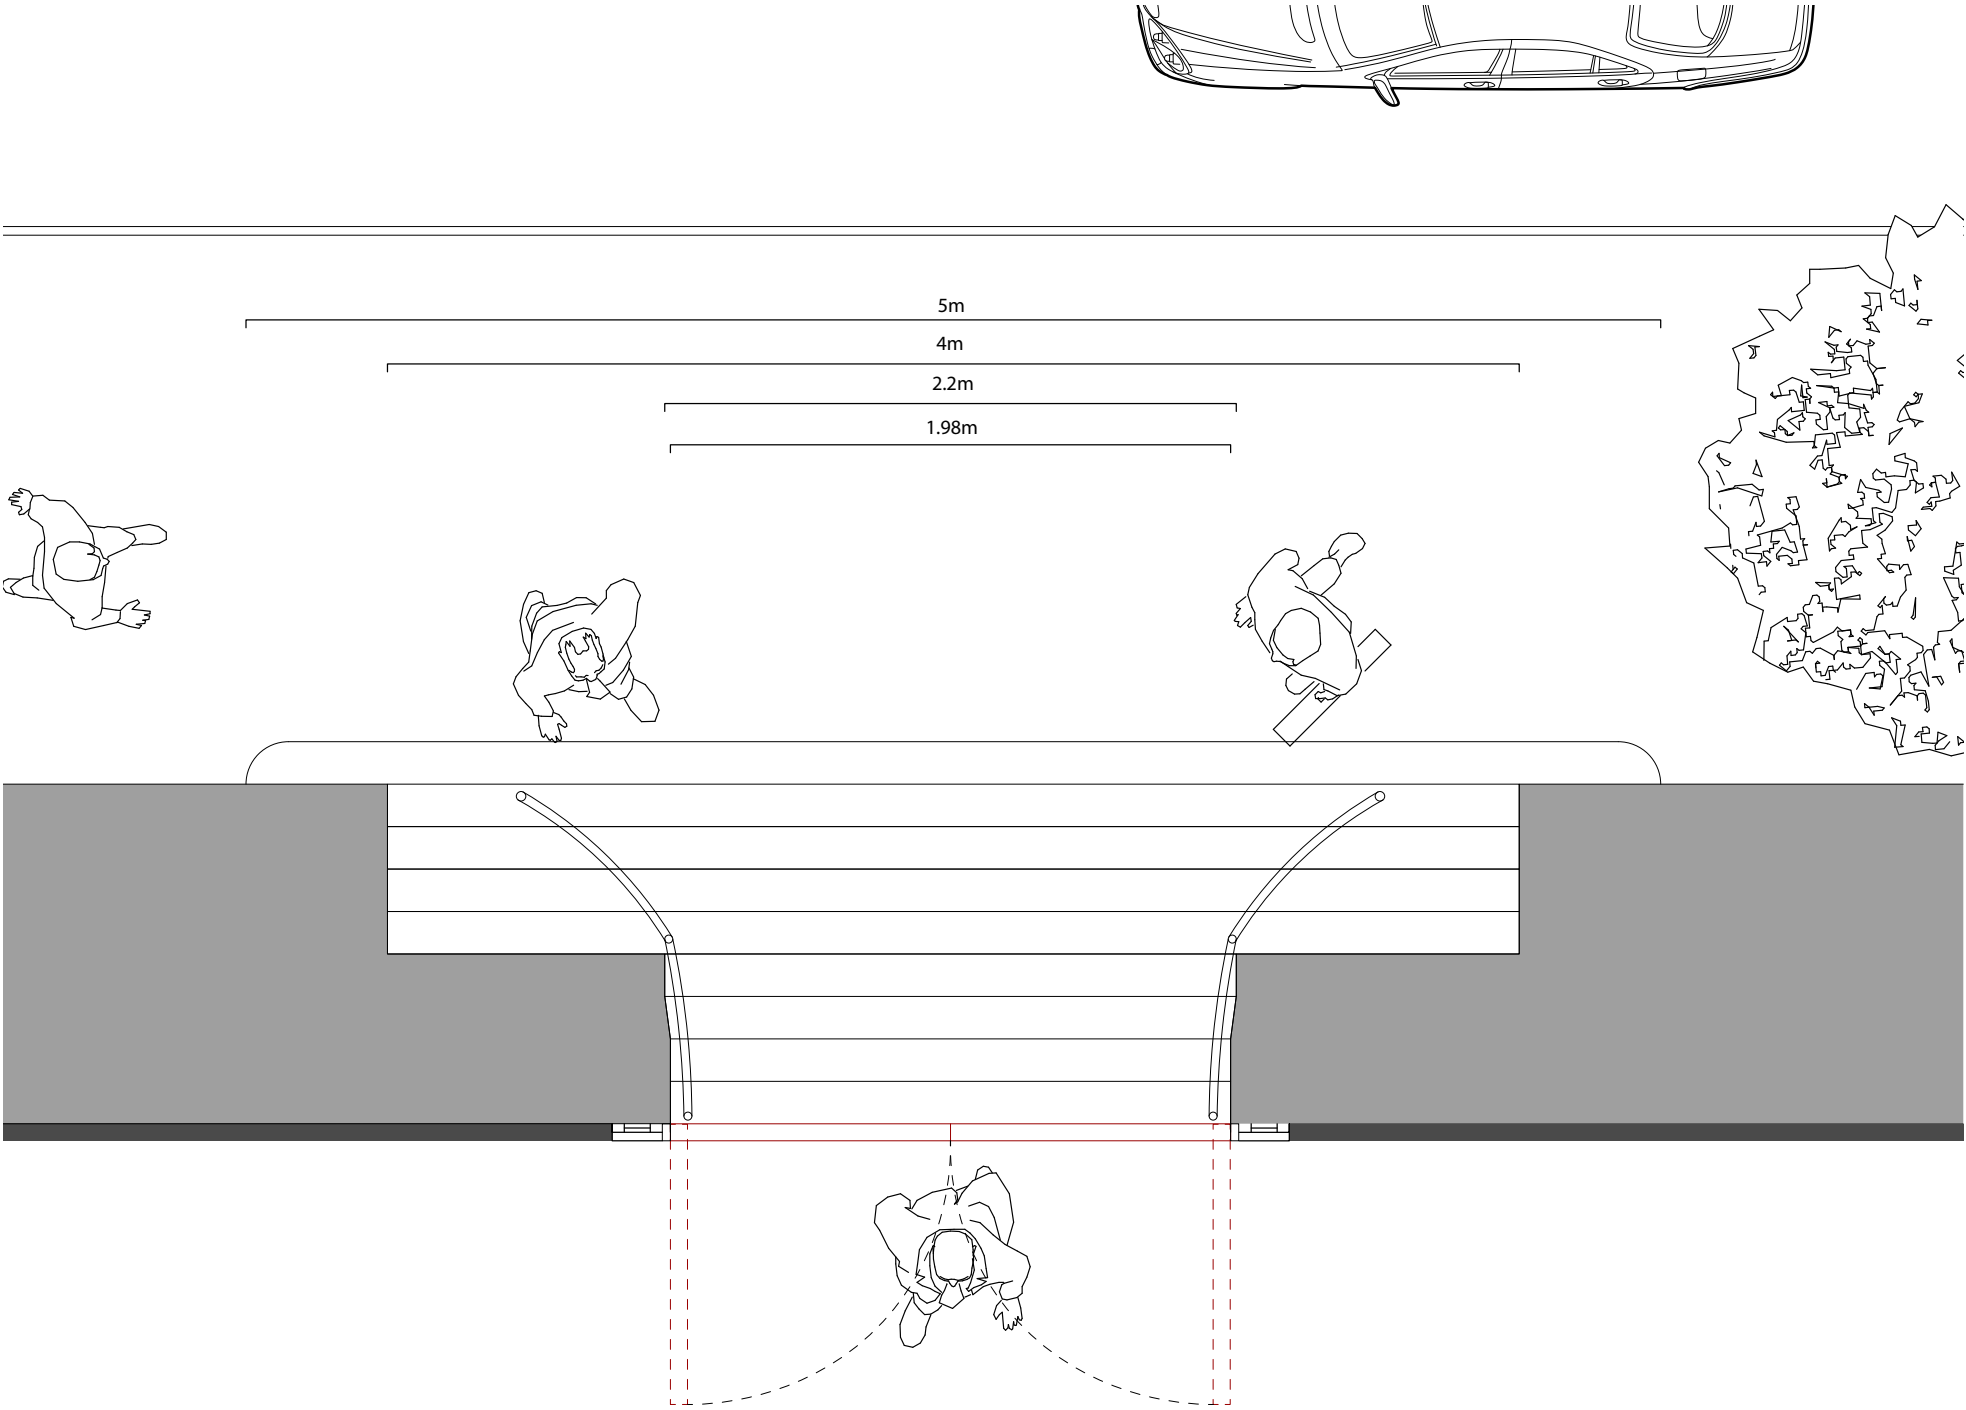

GUIDED TRANSITION

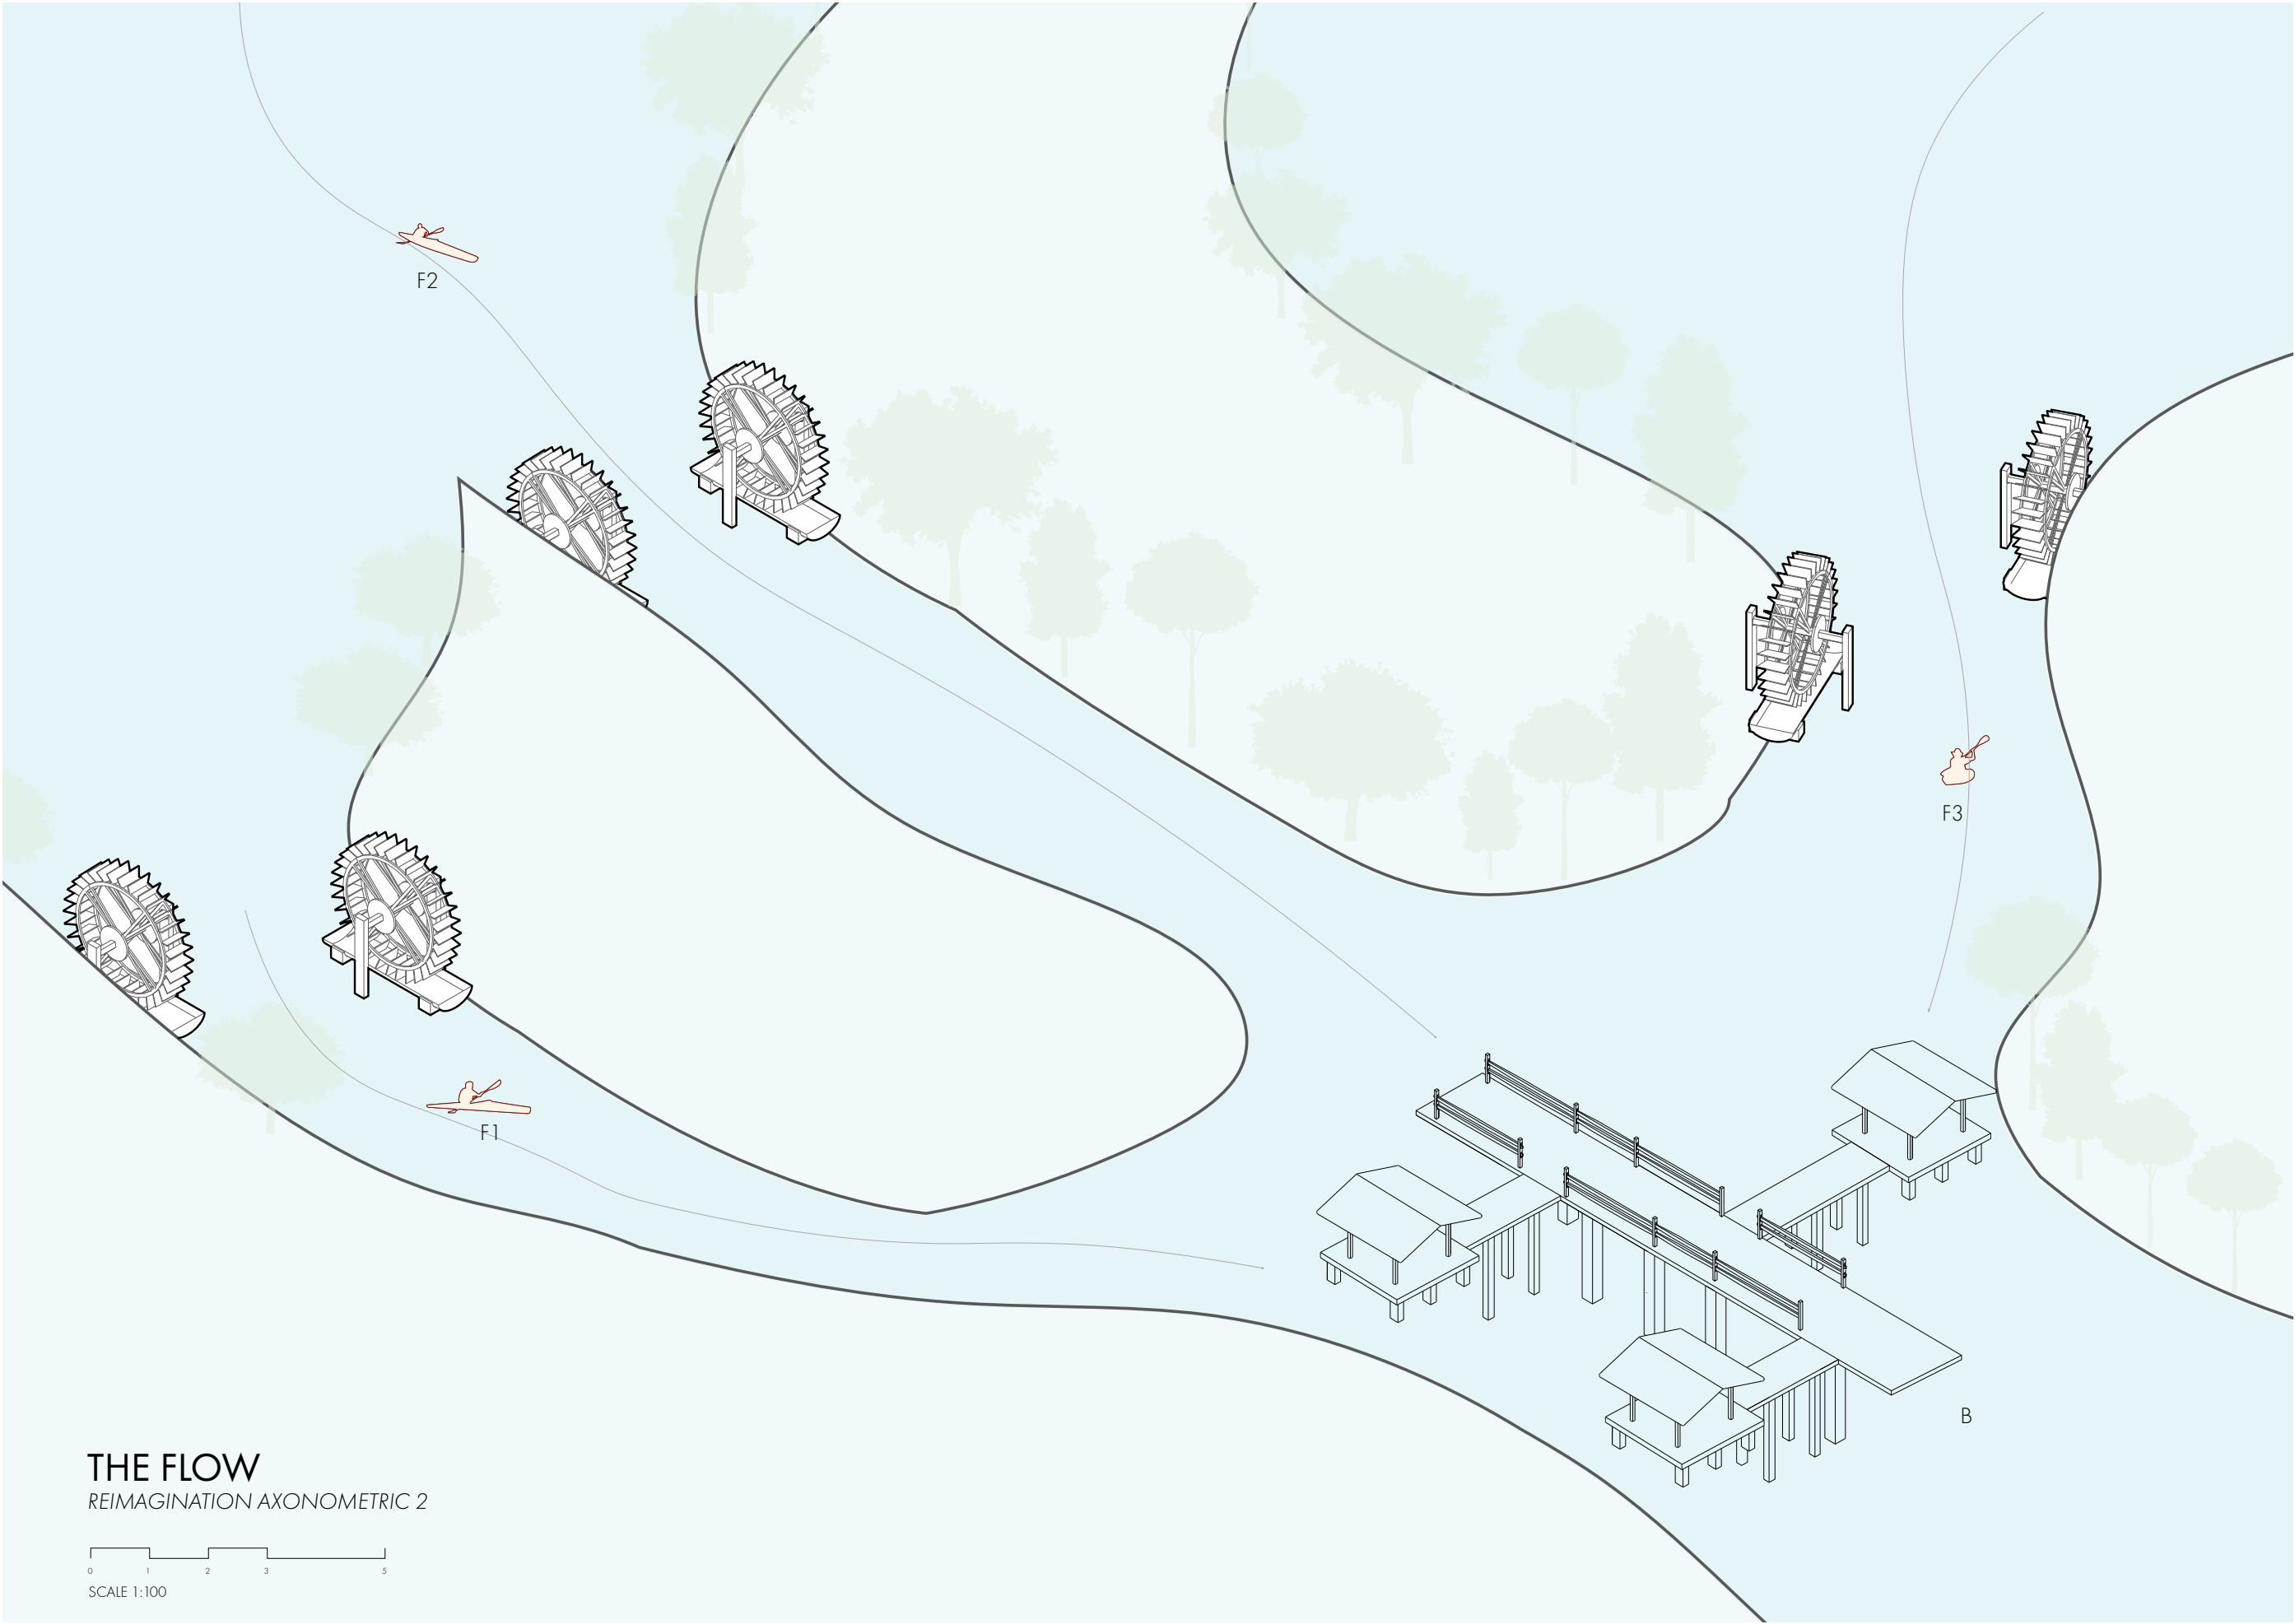

The chosen element is an classical entrance with front steps and handrails.

This sytem attracts the movement into the destination (door) by having a guiding element (handrail). Furthermore, the destination and the guide uses the same color (red) to magnify the spatial effect. The flow of movement might be different prior to approach the guide but the success of the guiding element draw all flows into one destination
