Front Elevation 1:100

RE-IMAGINATION DESCRIPTION

The building element we have chose this time is balcony. It is a balcony located at the second or third floor of a building which oftenly perform activities like art gallery. By absorbing the feedback from last task, we try to be more open minded and creative. Instead of considering things like scales, actual function or complexity, we decided to create something which is dramatic and at the same time maintain the same system. The observational tower is the reimagination that we've made. It fulfill the system of level of observation which people entering to a higher level from a lower level and gain different level of views.
