

Refuge island  
123 Queen St, Melbourne VIC 3000, Australia  
17/03/2021

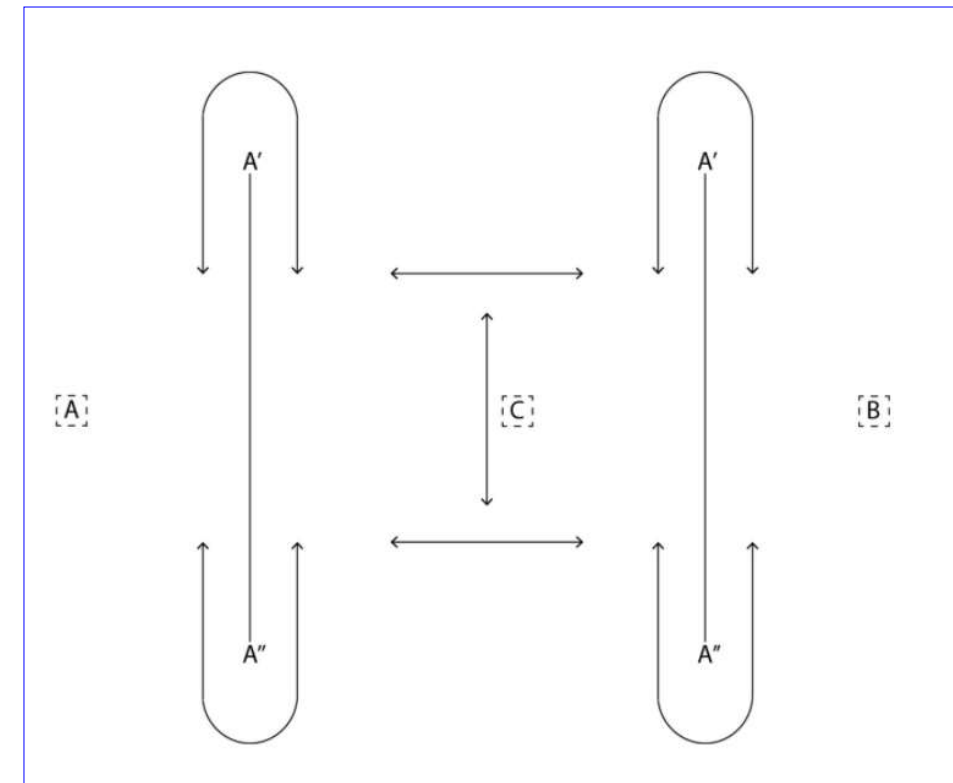

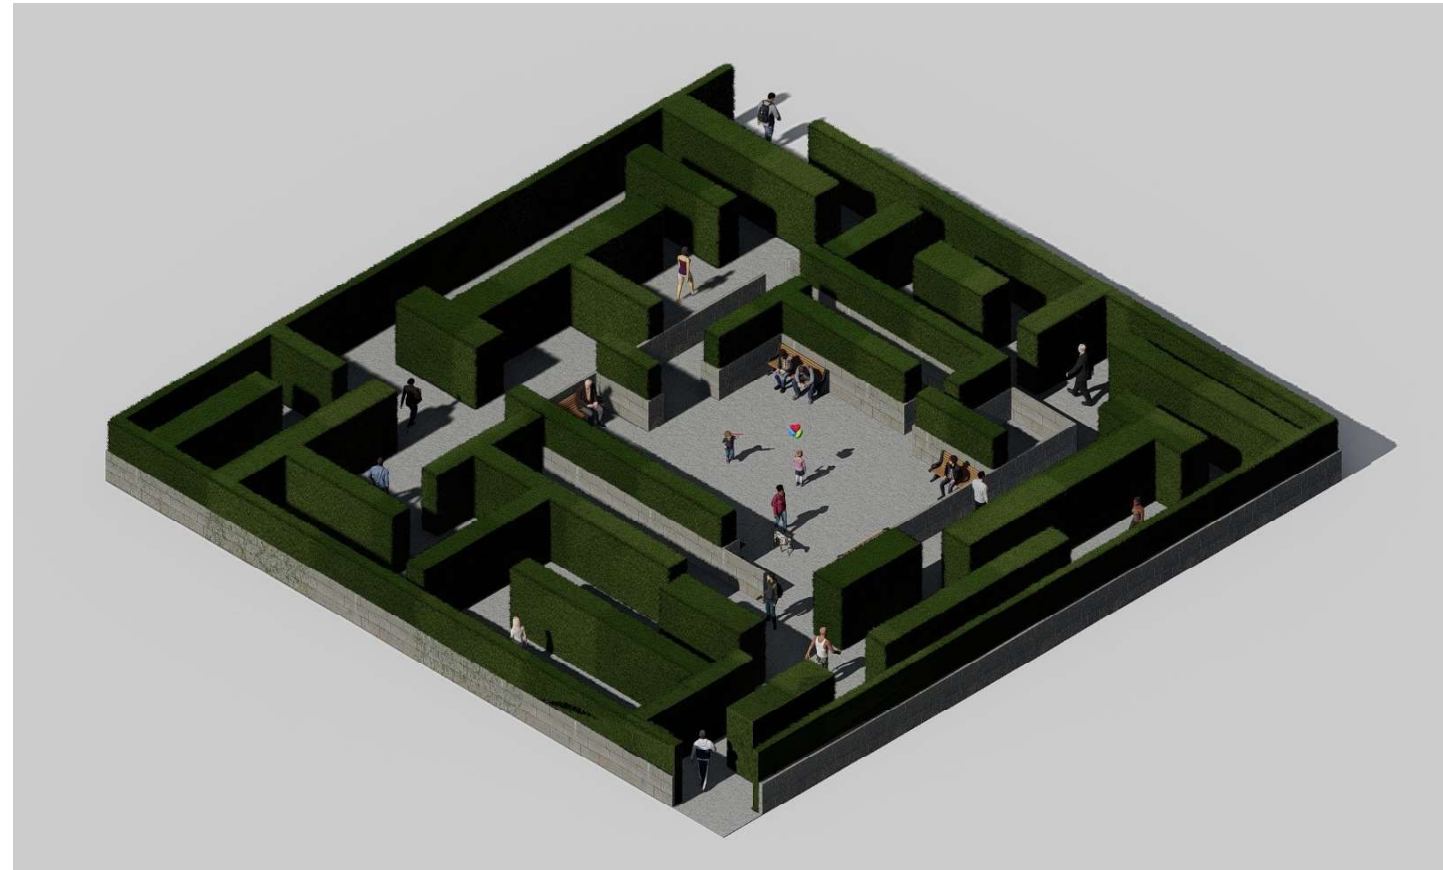

## BLOCKING SIDE

We choose the iron railings on the refuge island as our second building elements. There is a public toilet at the central of land and trees on both sides. This toilet is provide for passerby in hurry, therefore, it located in the middle of the road and near-by the crossing. The function of this railing is seperate the road from refuge island , and its also protect people who stay on this land.

## RE-IMAGINATION DESCRIPTION

The idea of maze was explored from the idea of creating a park or a garden. People can only enter or exit the maze with 2 entrances or exits at the same time, a little resting playing area is made at the middle of the maze which people can do their own things and play around in this area.
