SYSTEM DESCRIPTION

The Efexor medicine is used to treat anxiety and depression. According to the user's usage frequency, we get the rhythm displayed on the found object. For found object, there are two different situations: on and off. This creates a kind of rhythm between void and solid. It also develops in a specific order without repetition. As shown in the diagram, the threshold builds a connection between inside and outside. the void and solid blue frames indicate the irregular independent spaces but they work as a whole.
