

TOPIC

Melbourne Central Shopping
Centre, Swanston St &, La Trobe St,
Melbourne VIC 3000
7 AUG 2020

SYSTEM DESCRIPTION

This threshold is located in the La Trobe Street, Melbourne Central shopping center second floor, the **window** of Hoyts.

The threshold is a diamond- shaped **window**. Since the location faces northwest, there will be no strong direct sunlight entering the room. The windows of the space are high, and it is slanted upward, so people cannot see the busy street directly below. In this way, the window becomes a kind of **filter, eliminating the busy scene on the street**, so that people indoors can only enjoy the comfort of the day.

At night, the natural light gradually disappears, and the indoor bar shows strong colorful artificial light, creating an atmosphere of entertainment and leisure. The light in the house comes out through the windows, attracting people on the street to escape from the lonely dark night.

Plan
