

CATALOGUE 2
101 - 103 LITTLE BOURKE STREET
06.03.23

Voided Space

The element forms a void where vertical addition creates an additional volume to the space, manipulating it vertically to give it the capacity to open up to the rest of the building. Point A acts as the inside of the geometry, whilst point B acts as the outside of the geometry. Point AB is the vertical addition to the space where the void and the element form a new space.

VOIDED SPACE

MANIPULATING GEOMETRY HORIZONTALLY TO REMOVE
A SENSE OF CONFINEMENT AND PROVIDE A VARIETY
OF SPATIAL EXPERIENCES
