

**BUILDING ELEMENT 2.0**

QV BRIDGE  
QV MELBOURNE RED CAPELAND  
LONSDALE ST, VIC, MELBOURNE,  
AUSTRALIA,3000

Selected threshold bridge in Level 2.

SWANSTON

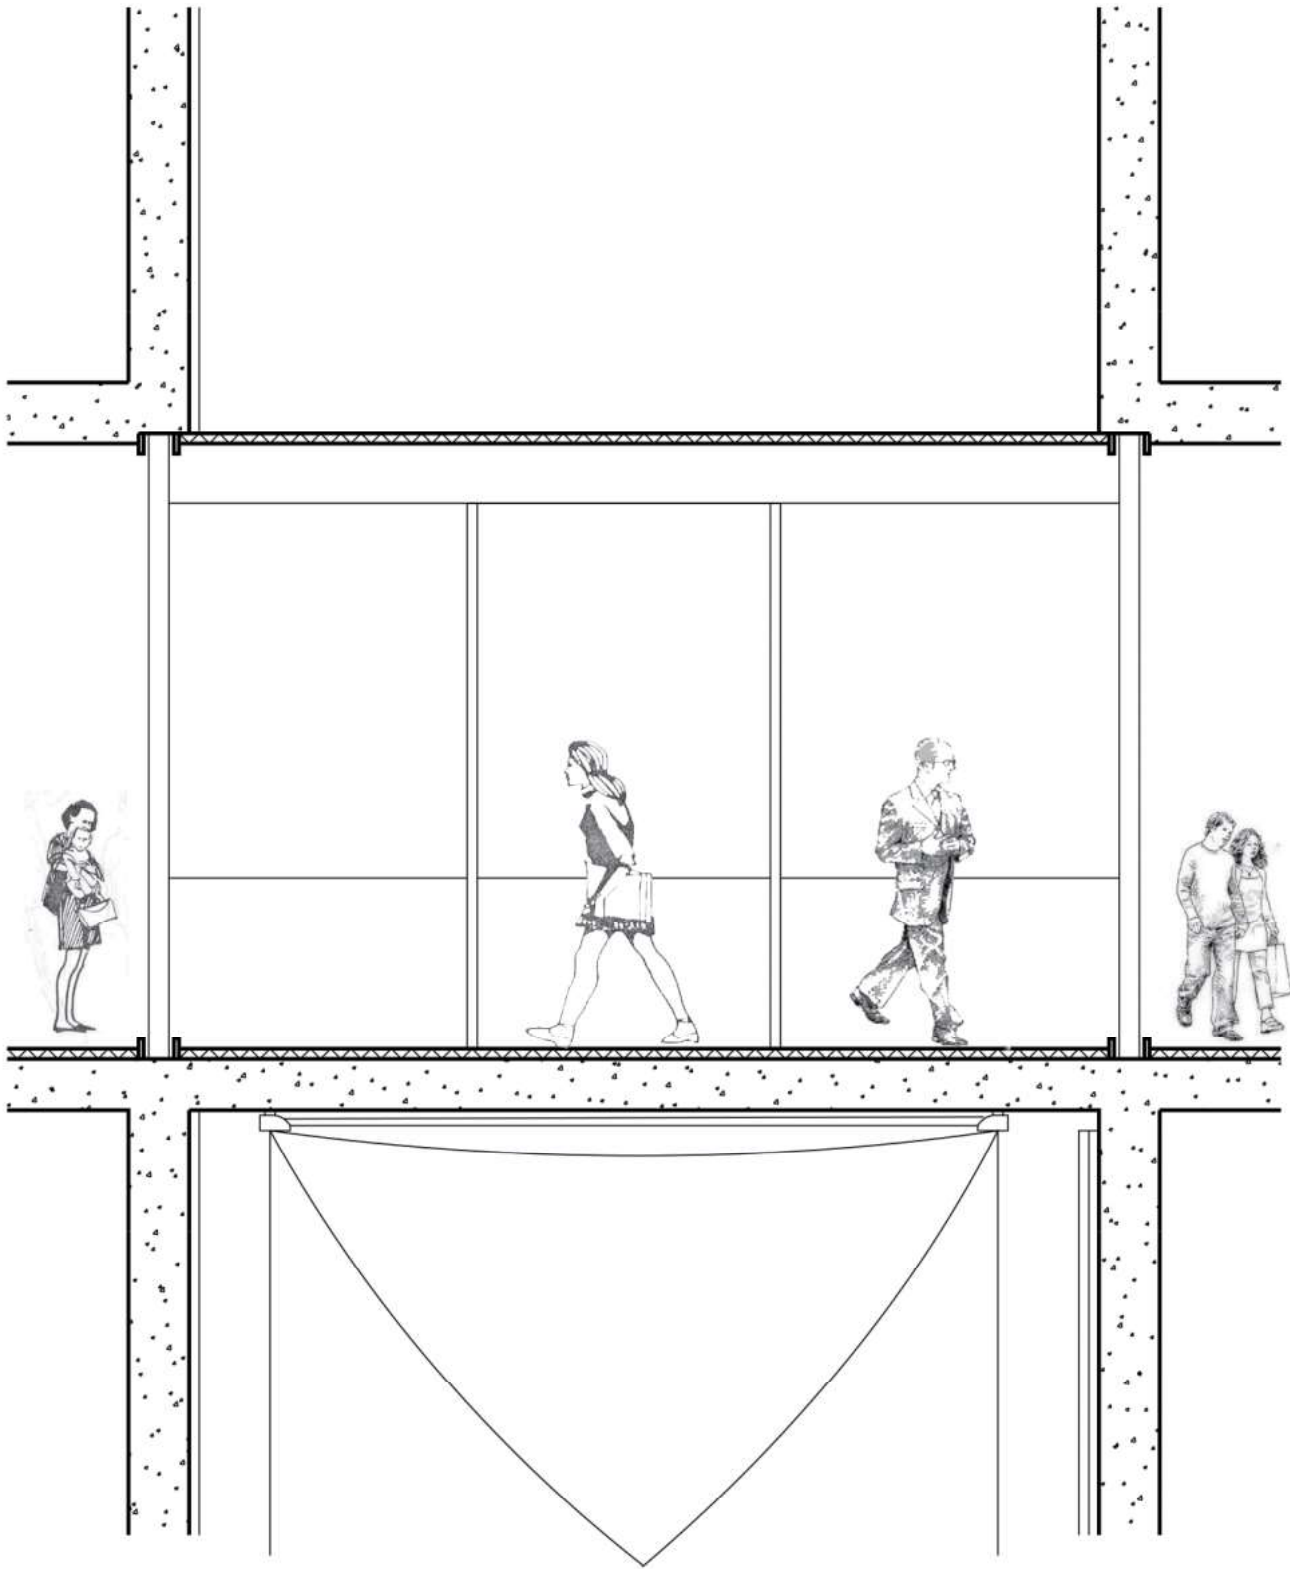

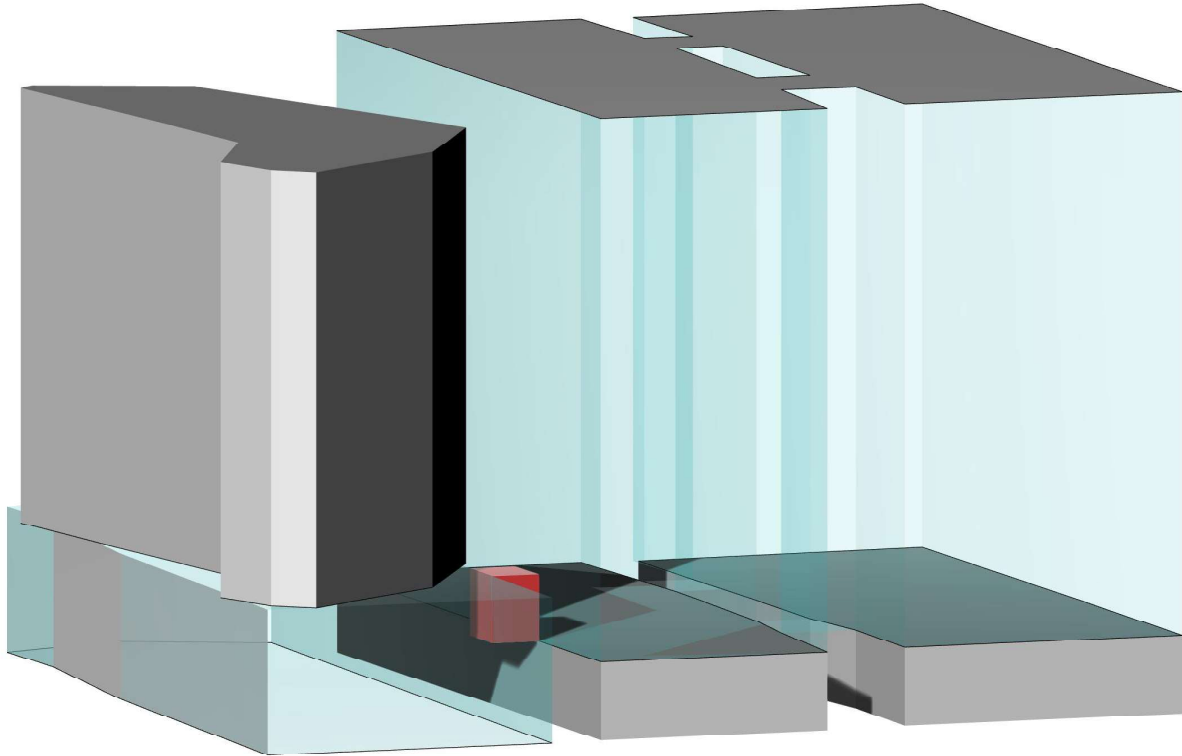

Small connection

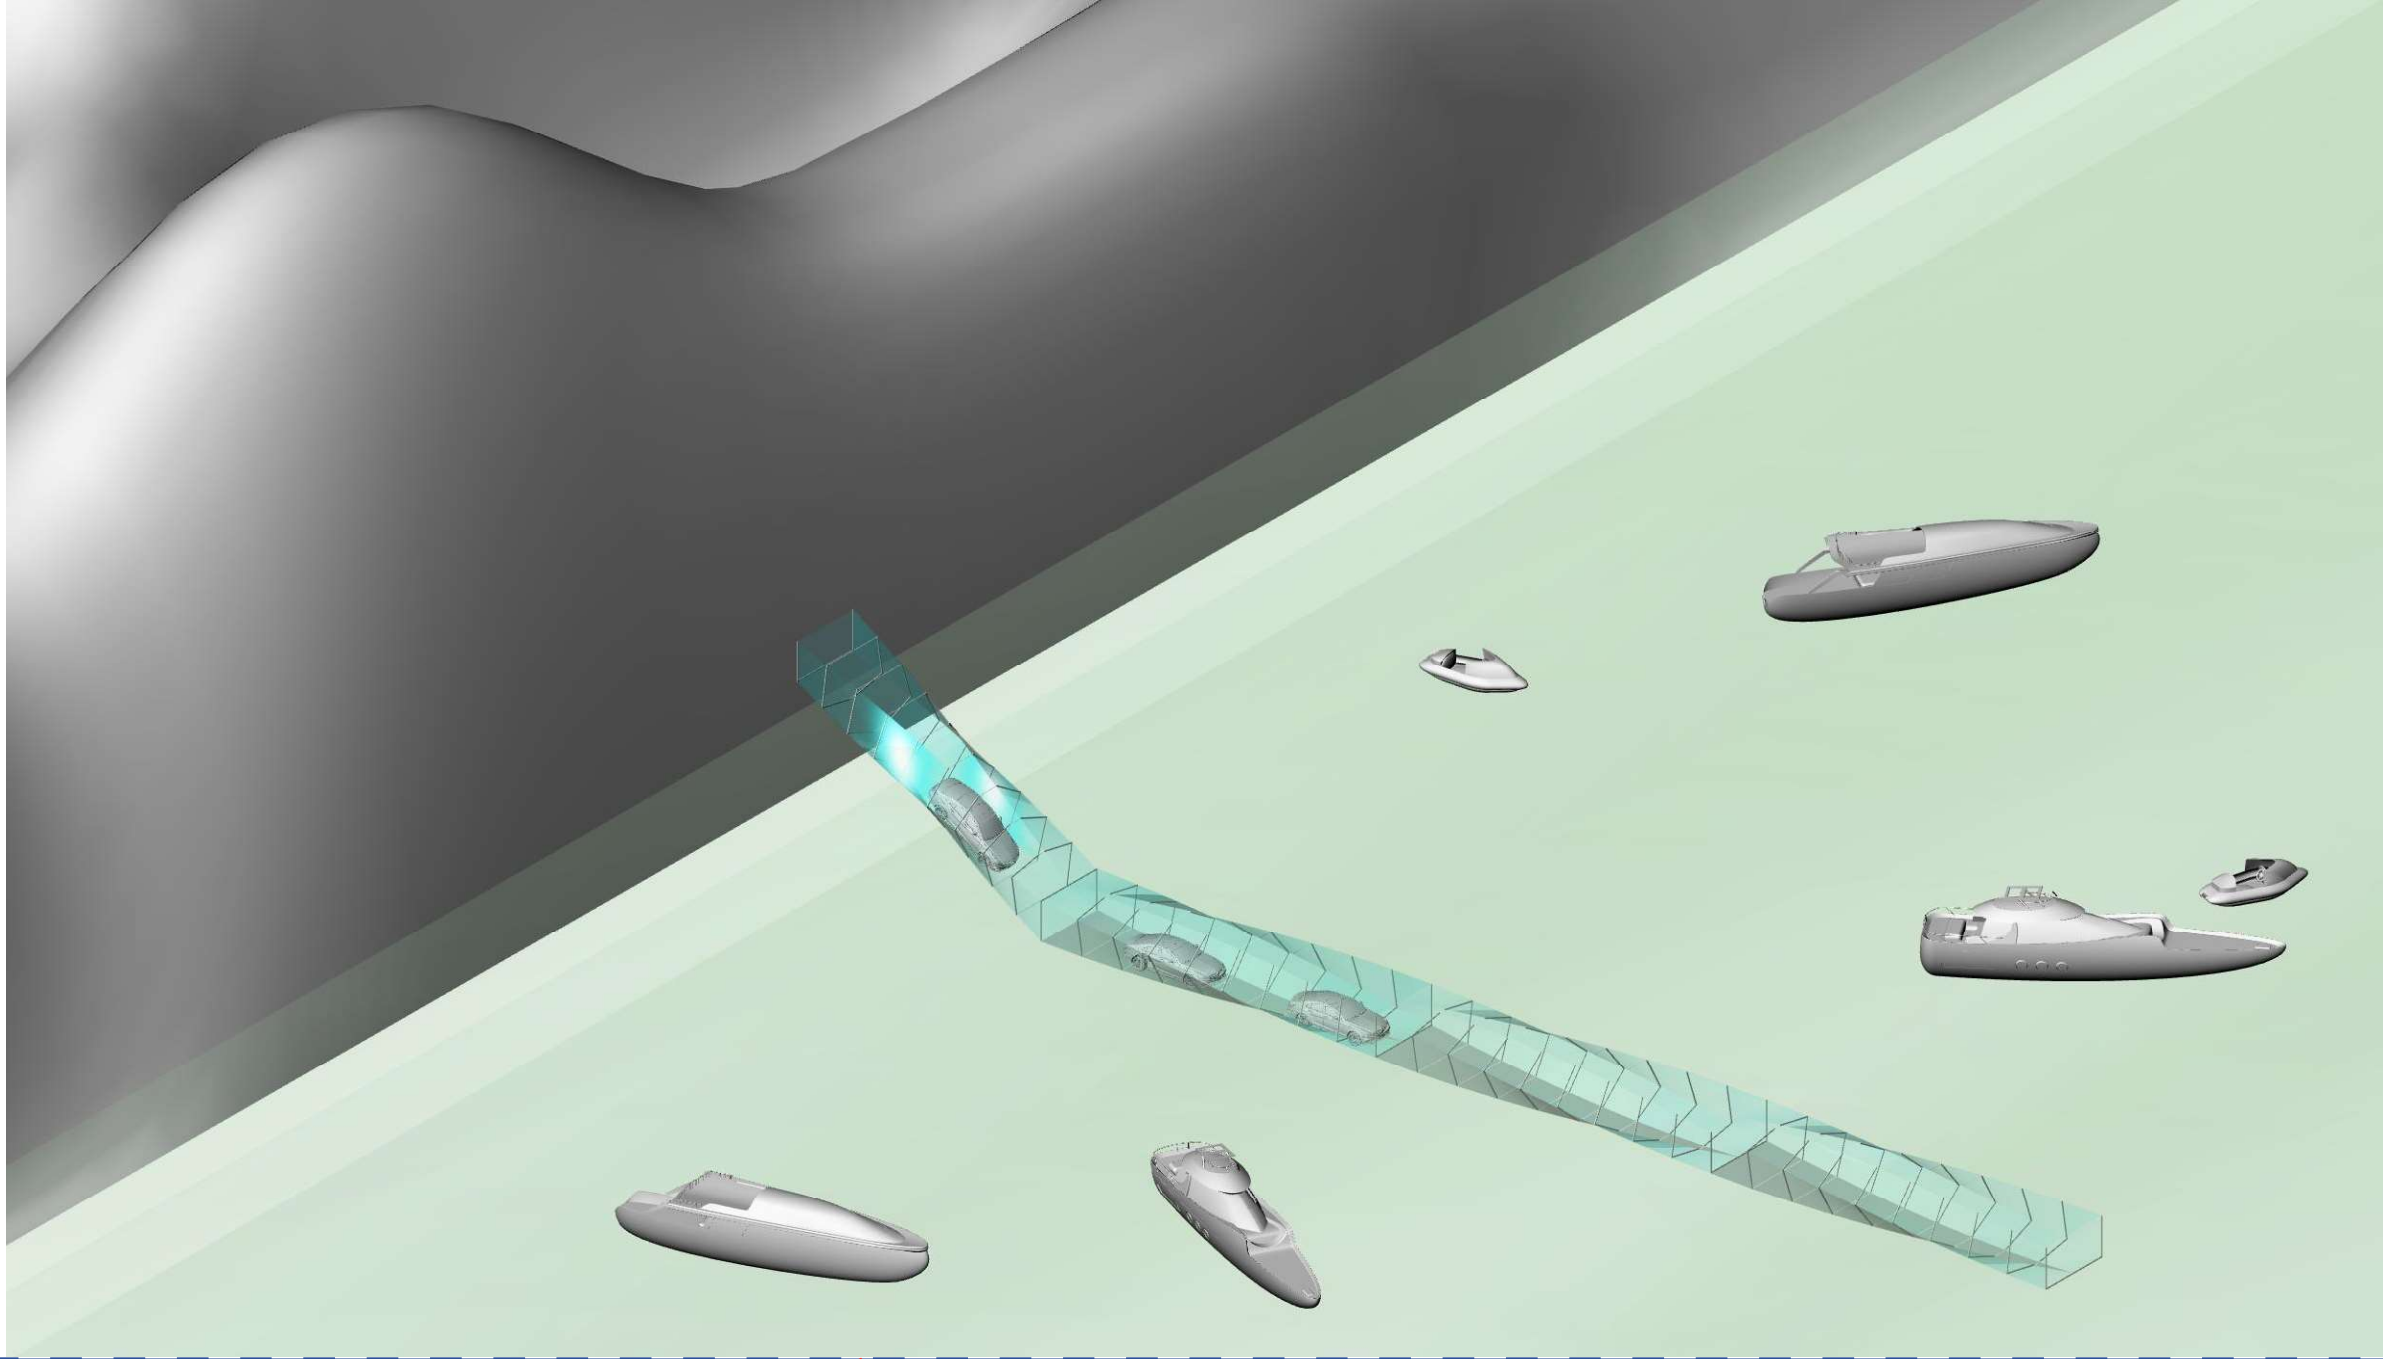

**SYSTEM DESCRIPTION**

Our threshold is located in QV Melbourne Red Capeland, lonsdale Stz Melbourne. It is a bridge between two buildings in level 2. Above the building on the left is a resident/apartment and below is the mall. The building on the right is a mall. This bridge connect different buildings with different factions as a threshold.

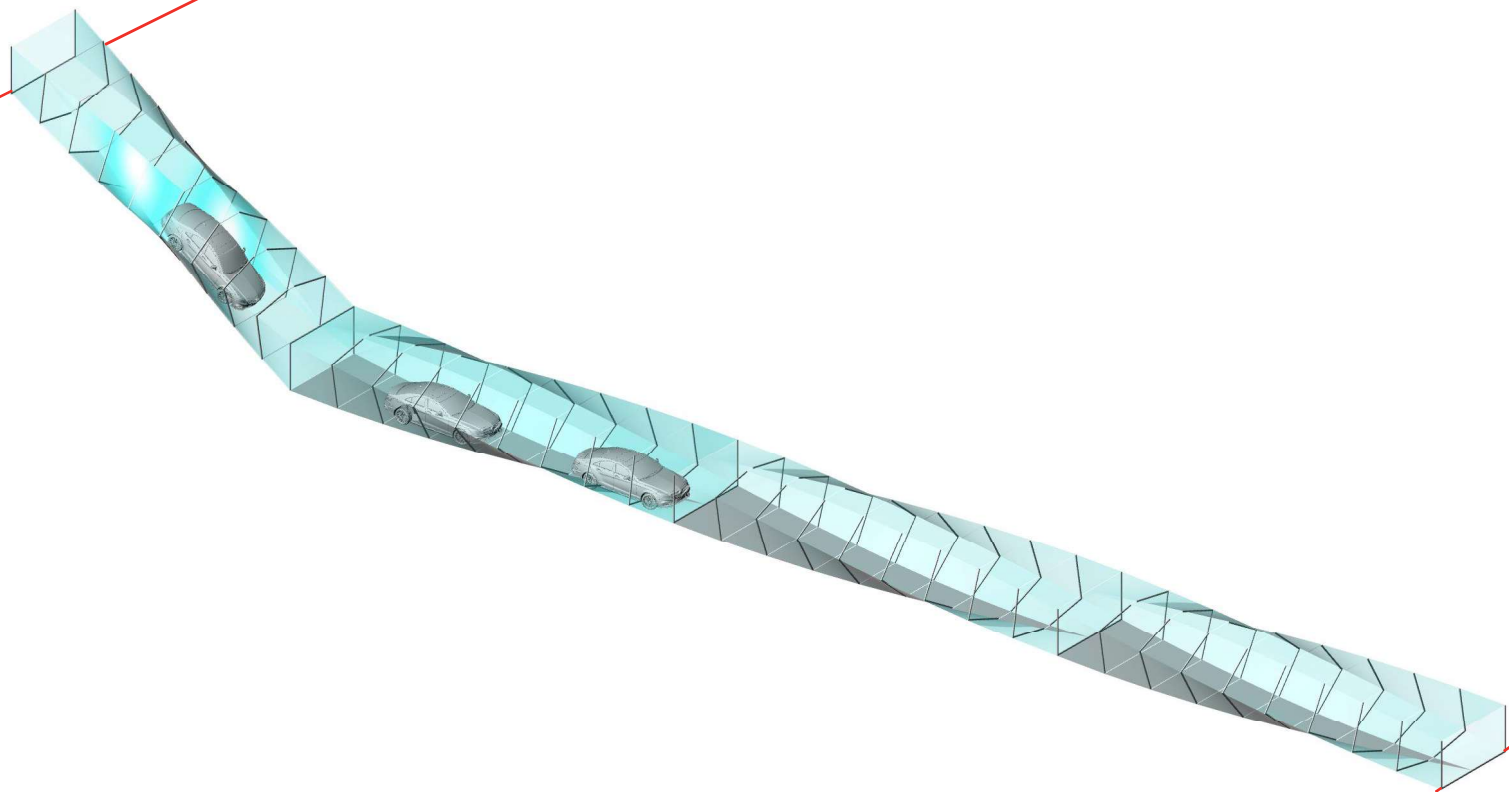

The diagram on the right shows how this bridge between two buildings works as a threshold. This threshold is a connection bewteewn the resident/apartment to the mall. Its a bridge be- twenen two buildings you need entry into the mall first and go up to level 2 than you can walk through this bridge. However, there is no restriction between them. So, basicly anyone can go to the resident by this bridge. There is a green line in the diagram because I remember that there was a show happened under the bridge. You can stand in there and watch that.
