POTENTIAL SPACE

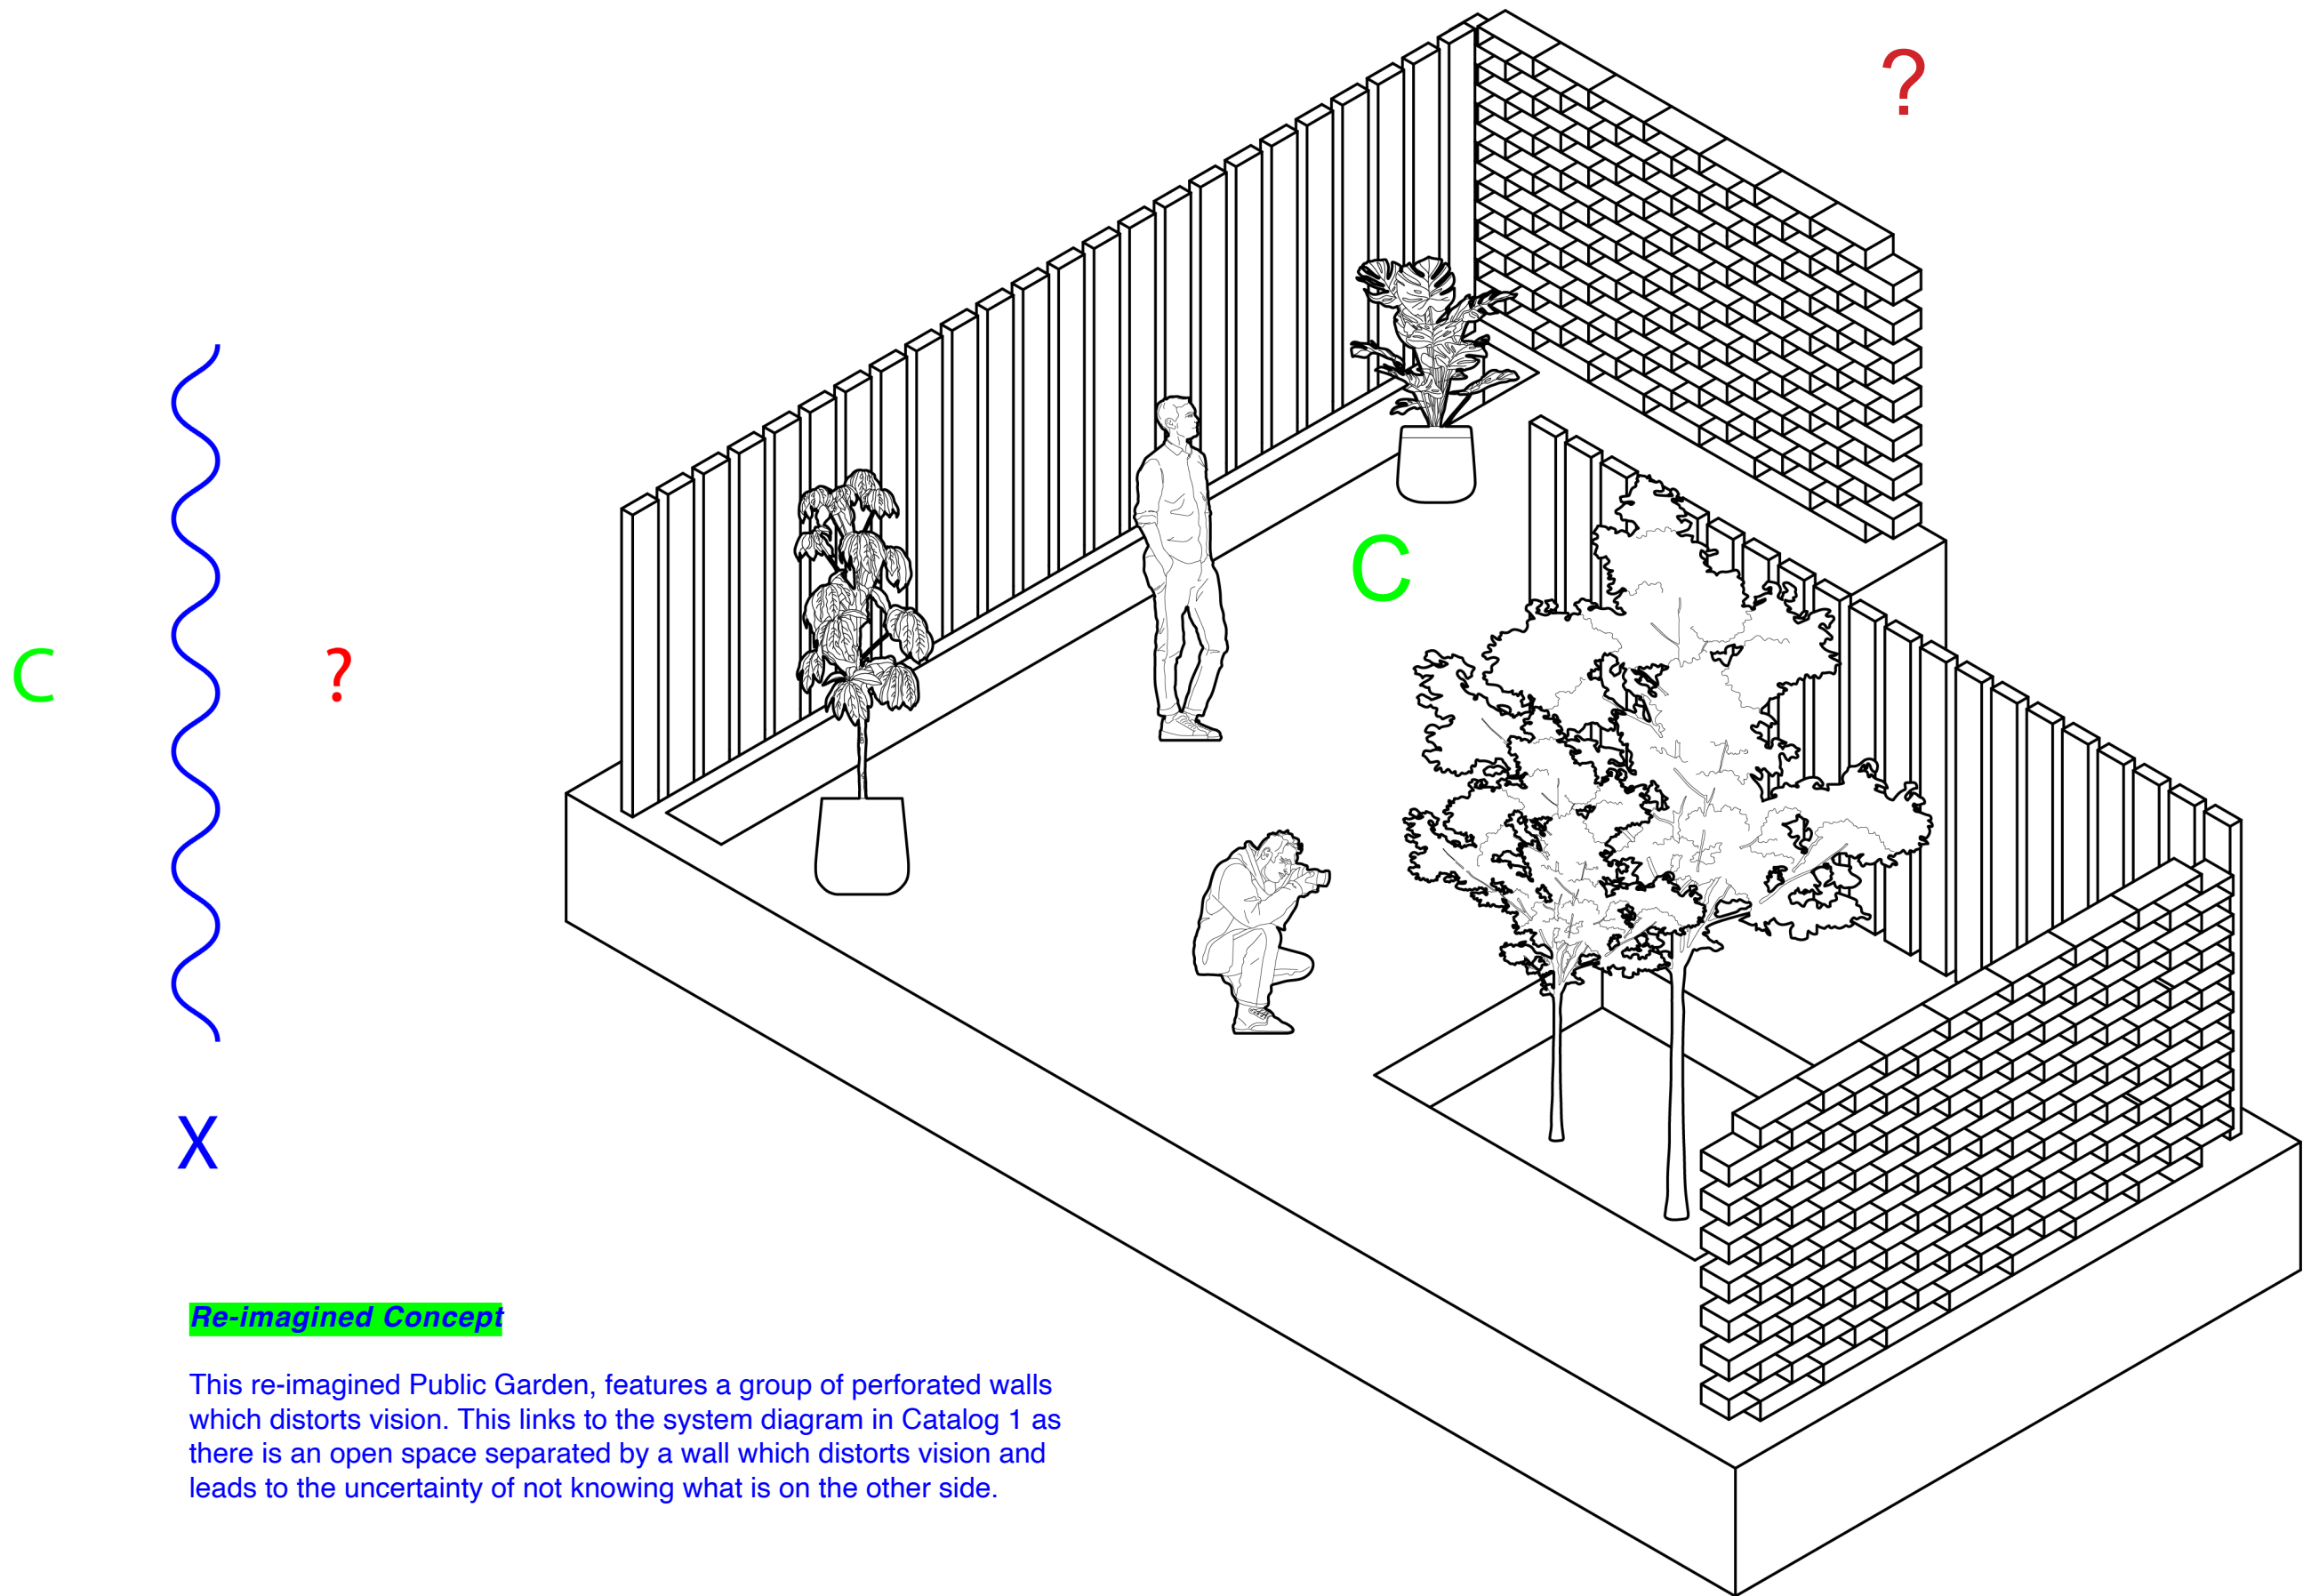

This system describes the uncertainty between two spaces. It can be seen that there is a wall separating two unknowns which can be seen through C (city) and ? (unknown space). The relationship between these two systems leads one to questioning what may be on the other side of this wall.

### Re-imagined Concept

This re-imagined Public Garden, features a group of perforated walls which distorts vision. This links to the system diagram in Catalog 1 as there is an open space separated by a wall which distorts vision and leads to the uncertainty of not knowing what is on the other side.
